today's the day the cops got involved.

now things are different, really different.

Henry's telegraph article was full of false statements. He can, and should, see the error in his ways, say that he was wrong, and agree to support the decision of the members. He must also agree not to make any other calls, not to appear at any meetings with George Piggins or his representatives, until after the March 19 vote.

We urgently need:

any letters written by Noeline, Norm or "George" for phrase comparison and testing and type recognition.

The wording of any threats made in the past

The links to any information available online from any person who has received calls over the last week from any representative of the No side.
